Page 9 of 17

In the Claims:

1.(currently amended) A cleaning article having a sheet configuration comprising a flexible substrate having a first portion, divided by an impermeable barrier extending through the flexible substrate from a second portion, wherein the first portion contains a cleaning composition, and the second portion is essentially dry, wherein the cleaning composition comprises:

- (a) 0.01-10%wt. of one or more surfactants selected from anionic surfactants, nonionic surfactants, cationic surfactants, amphoteric surfactants and mixtures thereof;
- (b) 2 ~~0~~ – 40%wt. of a scouring agent selected from the group consisting of oxides, carbonates, quartzes, siliceous chalk, diatomaceous earth, colloidal silicon dioxide, alkali metasilicates, organic abrasive materials ~~selected from polyolefins, polyethylenes, polypropylenes, polyesters, polystyrenes, acetonitrile-butadiene-styrene resins, melamines, polycarbonates, phenolic resins, epoxies and polyurethanes~~, abrasive water soluble salts, natural materials ~~selected from rice hulls, corn cobs, and the like~~, nepheline syenite, or talc and mixtures thereof;
- (c) 0 – 10%wt. of a thickener;
- (d) 0 – 10%wt. of one or more organic solvents;
- (e) 0.01 ~~0~~ – 7%wt. of an organopolysiloxane;
- (f) 0 – 3%wt. of an acid;
- (g) 0 – 5%wt. of one or more optional constituents;
- (i) to 100%wt. of water,

wherein the barrier prevents migration of the cleaning composition from the first portion of the cleaning article to the second portion of the cleaning article.

2.(original) The cleaning article of claim 1 wherein the cleaning composition comprises an organopolysiloxane.

US Serial No. 10/501177  
Page 10 of 17

- 3.(original) The cleaning article of claim 1 wherein the cleaning composition comprises an acid.
- 4.( previously presented) The cleaning article according to claim 1 wherein the cleaning composition comprises both an anionic and a nonionic surfactant.
- 5.( previously presented) The cleaning article according to claim 1 wherein the cleaning composition comprises 2-35%wt. of a scouring agent.
- 6.( previously presented) The cleaning article according to claim 1 wherein the cleaning composition comprises 0.01-5%wt of a ~~thickener~~ thickening agent.
- 7.( previously presented) The cleaning article according to claim 1 wherein the cleaning composition comprises 0.01-7%wt. of an organic solvent.
- 8.( previously presented) A method for the treatment of surfaces, particularly vitroceramic surfaces which method comprises the steps of:  
providing a cleaning article according to claim 1;  
applying the first portion of the cleaning article to a soiled surface, especially a vitroceramic surface;  
manually spreading the cleaning composition ~~product~~ and cleaning the soiled surface;  
subsequently removing the first portion of the cleaning article from the surface,  
applying the second portion of the cleaning article to the surface to manually buff the ~~treated~~ surface to provide a shined, cleaned appearance.
- 9.(original) A cleaning article according to claim 1 wherein the impermeable barrier is a heat sealed strip extending through the flexible substrate or is a layer or strip of a cured resin on the substrate.

US Serial No. 10/501177

10.(currently amended) A cleaning article having a sheet configuration comprising a flexible substrate having a first portion, divided by an impermeable barrier extending through the flexible substrate from a second portion, wherein the first portion contains a cleaning composition, and the second portion is essentially dry, wherein the cleaning composition consists essentially of:

- (a) 0.01-10%wt. of one or more surfactants selected from anionic surfactants, nonionic surfactants, cationic surfactants, amphoteric surfactants and mixtures thereof;
- (b) 2  $\theta$  - 40%wt. of a scouring agent selected from the group consisting of oxides, carbonates, quartzes, siliceous chalk, diatomaceous earth, colloidal silicon dioxide, alkali metasilicates, organic abrasive materials ~~selected from polyolefins, polyethylenes, polypropylenes, polyesters, polystyrenes, acetonitrile-butadiene-styrene resins, melamines, polycarbonates, phenolic resins, epoxies and polyurethanes~~, abrasive water soluble salts, natural materials ~~selected from rice hulls, corn cobs, and the like~~, nepheline syenite, or talc and mixtures thereof;
- (c) 0 - 10%wt. of a thickener;
- (d) 0 - 10%wt. of one or more organic solvents;
- (e) 0.01  $\theta$  - 7%wt. of an organopolysiloxane;
- (f) 0 - 3%wt. of an acid;
- (g) 0 - 5%wt. of one or more optional constituents;
- (i) to 100%wt. of water,

wherein the barrier prevents migration of the cleaning composition from the first portion of the cleaning article to the second portion of the cleaning article.

11.( previously presented) The cleaning article of claim 10 wherein the cleaning composition comprises an organopolysiloxane.

12.( previously presented) The cleaning article of claim 10 wherein the cleaning composition comprises an acid.

US Serial No. 10/501177  
Page 12 of 17

- 13.( previously presented) The cleaning article according to claim 10 wherein the cleaning composition comprises both an anionic and a nonionic surfactant.
- 14.( previously presented) The cleaning article according to claim 10 wherein the cleaning composition comprises 2-35%wt. of a scouring agent.
- 15.( previously presented) The cleaning article according to claim 10 wherein the cleaning composition comprises 0.01-5%wt of a thickener ~~thickening agent~~.
- 16.( previously presented) The cleaning article according to claim 10 wherein the cleaning composition comprises 0.01-7%wt. of an organic solvent.
- 17.( previously presented) A method for the treatment of surfaces, particularly vitroceramic surfaces which method comprises the steps of:  
providing a cleaning article according to claim 10;  
applying the first portion of the cleaning article to a soiled surface, especially a vitroceramic surface;  
manually spreading the cleaning composition ~~product~~ and cleaning the soiled surface;  
subsequently removing the first portion of the cleaning article from the surface,  
applying the second portion of the cleaning article to the surface to manually buff the ~~treated~~ surface to provide a shined, cleaned appearance.
- 18.( previously presented) A cleaning article according to claim 10 wherein the impermeable barrier is a heat sealed strip extending through the flexible substrate or is a layer or strip of a cured resin on the substrate.
- 19.(new) A cleaning article according to claim 1 comprising organic abrasive materials selected from: polyolefins, polyethylenes, polypropylenes, polyesters,

US Serial No. 10/501177  
Page 13 of 17

polystyrenes, acetonitrile-butadiene-styrene resins, melamines, polycarbonates, phenolic resins, epoxies and polyurethanes.

20.(new) A cleaning article according to claim 1 comprising natural materials selected from rice hulls and corn cobs.

21.(new) A cleaning article according to claim 10 comprising organic abrasive materials selected from: polyolefins, polyethylenes, polypropylenes, polyesters, polystyrenes, acetonitrile-butadiene-styrene resins, melamines, polycarbonates, phenolic resins, epoxies and polyurethanes.

22.(new) A cleaning article according to claim 10 comprising natural materials selected from rice hulls and corn cobs.
